Skills

- HTML5 | CSS3 | JavaScript | TypeScript | Java | React Js | Redux | Next | Tailwind | Git | Node | Rest Api
- MongoDB | Prisma | DataStructure | Object Oriented Programming | My SQL | Firebase | Frontend
- Headless Ui | Zod | Starpi | Backend | Full-Stack | English , Hindi - All professional proficiency or above

Experience

Freelancing (Eccentric India)

[Source Code](#)

July 2023 - Oct 2023

- Engineered a MERN web app, elevating online presence and boosting customer engagement with a 40% increase in product views.
- Managed Eccentric India's backend, integrated shipping, and Stripe, yielding a 30% increase in successful transactions for the web app.
- Technical Stacks: JavaScript, TailWindCSS, React.js, Redux, Stripe API, Node.js, Express, JSON Web Token, and MongoDB
- Implemented product comments, user/admin roles, and 2-currency support (INR/USD) for enhanced MERN app functionality.

Projects

[Consumer-2-Consumer](#)

[Source Code](#)

Apr 2023 - June 2023

- Crafted a user-friendly site for lenders and borrowers, streamlining listings, searches, and communication for enhanced interaction.
- Leveraged Multer and Sharp to facilitate secure uploads, resulting in a 25% increase in user engagement and item listings.
- Engineered socket for 100% real-time discussions, enhancing engagement and interaction among enthusiasts.
- Technical Stacks: JavaScript, TailWindCSS, React.js, Redux, Stripe API, Node.js, Express.js, Sockets, Sharp, Multer, and MongoDB.

[ChatWithPdf](#)

[Source Code](#)

June 2023 - Present

- Developed a PDF-based question-answering web app with Next.js and integrated a scalable PlanetScale database for efficient document querying.
- Implemented subscription functionality to monetize the platform, showcasing revenue-generating feature development
- Technical Stacks: NextJs , Zod , Tailwind Css , React js , Stripe Webhook , TypeScript , PlanetScale Db , Prisma

[Food Ordering Web App](#)

[Source Code](#)

Jan 2023 -March -2023

- Developed a versatile burger menu and order management system, improving user experience and operational efficiency.
- Implemented a comprehensive burger menu system, allowing users to place and track orders, while enabling administrators to efficiently update order statuses (delivered or canceled) for streamlined operations.
- Technical Stacks: React Js , Redux , Scss , css , tailwind css , chart js , Node js , Express js

[Maze](#)

[Source Code](#)

Sep 2023 - Present

- Designed and architected a secure and user-centric NFT marketplace, facilitating the trade and exhibition of distinctive digital assets.
- Enhanced NFT marketplace, delivering a seamless user experience with 30% faster browsing, buying, and selling capabilities.
- Technical Stacks: Tailwind CSS, Next.js, Solidity, Node.js, Express.js, MongoDB, Rest API, Hardhat, and Ether.js.

Education

Bachelor Of Technology - IT -CGPA: 6.05

PSIT College Of Engineering

Kanpur , UP,IN sep 2020-Present

Intermediate School - Percentage: 80%

KSIC Inter College

Kanpur, UP, IN 2017 -2018

Certification

- Java: Java and DSA Certified, demonstrating software development and problem-solving skills
- Full-Stack: Earned full-stack certificates from Meta, demonstrating expertise in front-end and back-end development
