EXPERIENCE

Web Devloper
Open Source Contribution
· Redesign the whole website using the latest technology Tailwind CSS and manage the dataflow into the website
· Also Design the UI of the website that helps users to navigate easily.

Backend Devlopment
Open Source Contribution
· Implementing a feature that helps users to log in via multiple platforms like GitHub, Twitter, and Google.
· This feature allows OneTap authentication for seamless user login, streamlining the form-filling process and eliminating the need for manual data entry.

PROJECTS

MAZE
College Project · March 2023 – Present
· Developing a user-friendly NFT marketplace with robust features like exchange and ownership of unique digital assets in a secure and transparent manner
· We'll also Implement a secure payment gateway integrated with cryptocurrency functionality within the decentralized NFT marketplace

SHOP
Personal Project · January 2023 – February 2023
·This platform seamlessly combines the capabilities of an e-commerce marketplace, allowing users to effortlessly list and sell their products, with a streamlined buying experience for customers.
· By leveraging our platform, users can set up their online stores and showcase their products to a vast and diverse customer base.

Consumer to Consumer
As a college Project · November 2022 – January 2023
· Consumer-to-consumer (C2C) is an online platform that helps to reduce the middleman from the transactions.
· Emphasize that the project enables direct communication between consumers, allowing them to negotiate, ask questions, and exchange information.
